Googolplex (Googolplex. Verdens største tall)

Picture Book | Gyldendal | 2017 | 44 pages

Googolplex is an unusual book: a book for reading aloud about small and large numbers, especially about quite incredibly, incomprehensible, enormous, huge numbers. And that means also about the infinite, incomprehensibly large universe.

By using recognisable situations from everyday life, and taking small, concrete numbers and sizes as its point of departure, the book helps build up the child's growing understanding of numbers. How large can numbers actually be? Is infinite a number? And is Googolplex the very, very biggest number in the world?

Illustrated by Rune Markhus.

Make it on Your Own Outdoors. A Junior Woodchuck's Guide (Klar deg selv i naturen. En hakkespettbok)

Non-Fiction | Spartacus | 2017 | 144 pages

Have you ever wondered what you would do if you had to make it on your own? If you were stranded on a deserted island or the family car broke down in the middle of nowhere. What if you got lost in the woods and could not find the way home?

This book will teach you how to stay warm, dry and healthy and keep your belly full when you are all alone in the great outdoors. You will also learn how to navigate by the sun and stars, signalling for help, forage for edible plants, filtering water, lighting a fire with a fire drill and much more. And what is the best way to build a snow cave, and how do you behave if you encounter a bear?

Illustrated by Silje Ensbj.

Plastic Waste in the Sea (Søppelplasten i havet)

Non-Fiction | Cappelen Damm | 2016 | 56 pages

People first started making plastic out of oil in a large amount in 1950. Paper and apple cores break up quickly in the sea, but plastic doesn't. We're producing more and more plastic every year. Researchers think that there are around 100 million tons of plastic floating around in the sea. This waste, which respects no national borders, is carried away by the ocean currents and distributed over the whole of the earth. In thirty years, there will be more plastic than fish in the sea if we carry on dumping at the same rate as we are now.

What can we do? The polluters are the ones who have responsibility for what they are dumping in the sea. The politicians must pass laws and regulations in their own countries and work with other countries to clean up the ocean. But we can also do a lot where we live. Researchers are working to find ways to collect up all the millions of tons that are floating out at sea. And it's urgent!

Ida (Ida)

Non-Fiction | Cappelen Damm | 2012 | 72 pages

47 million years ago there lived an ape-like little creature in a jungle in Germany. Today she is best known to the world as the fossil Ida. In this wonderful, illustrated picture book we learn how she lived and how we know what we do about her today.

When paleontologist Jørn Hurum introduced Ida to the world's media in 2009, she became a scientific sensation. Ida is our very own 47 million year old ancestor, and this picture book written by Jørn Hurum and Torstein Helleve from the Natural History Museum and illustrated by Esther van Hulsen brings Ida to life once again.

The reader is taken on a journey to the jungle that Ida lived in as part of a stunningly illustrated tale of her life, where we follow her through dangers and triumphs. In addition to a fictionalised picture book section based on what we know about Ida and the time that she lived, the book also includes a fact and activity section.

Bjørn Ousland

Northward - With Nansen to the North Pole (Nordover. Med Nansen mot Nordpolen)

Picture Book (Vol. I in a series of IV) | Cappelen Damm | 2008 | 56 pages

Midsummer Eve 1893, the canons sound at Akershus fortress and the ship Fram sails into Oslofjord. The ship is on its way to the North Pole and Fridtjof Nansen is onboard. Ousland presents the relationships onboard the Fram during the three-year expedition to the polar ice, and the dramatic attempt to reach the pole itself by ski and sled. The book includes everything from text and illustrations to cartoon strips, making *Northward* a fast-paced non-fiction book guaranteed to appeal to young readers. For ages 9–14 years.
