Category: Novel
Publisher: Bonnier Norsk Forlag
Year: 2023
Pages: 567
ISBN: 9788234717413
English sample translation available

A historical page-turner inspired by actual events. Three men. A dizzying goal. A desperate journey through Norway. In 1767, Maximilian Hell, imperial court astronomer in Vienna, is given a surprising task: To travel as far north and east as it is possible to get in the known world to observe the passage of Venus. It's a 5,000 kilometre journey, under brutal conditions, to the most inhospitable place on Earth, Vardø in Norway, with one overriding goal in mind: to determine the Earth's distance from the sun. It is an expedition that will take several years, equipped with the most advanced technology of the time, followed with a keen eye by the planet's scientific elite, faced with unsolvable problems: logistics, isolation, internal contradictions and violent forces of nature. But Maximilian Hell has God on his side; and the not so successful Norwegian Jens Finne Borchgrevink as his personal guide.

'Simply put a very good novel.'

Nettavisen

'A rare event. Vetle Lid Larssen is superb at capturing the spirit of the times through language, characters, details, thoughts, smells and moods.'

Dagbladet

'A wild novel.'

VG

'An adventurous story about brilliant and ambitious people in a very demanding environment.'

Adresseavisen

'God, power, prestige and a breakneck expedition. These are the ingredients of Vetle Lid Larssen's successful novel.'

Vårt Land
