Green Stuff introduces environmental issues in a fresh and accessible way. The book is a collection of comic strips about climate and the environment. The strips have since 2016 been on the back of Norway's largest newspaper's edition for kids (*Aftenposten junior*). Teachers feed back that they use the materials for ages ranging from 7 to 16.

Jenny Jordahl has a unique and playful style, and Ole Mathismoen has reported on climate- and environment issues as a journalist for more than 30 years. The two of them are characters in the comic strips which makes the complex and sometimes difficult topics more accessible to the reader.

Grave subjects such as climate change and the threat to the environment are made accessible through this book. Children are concerned with pollution from plastics and natural resources vanishing. The book is packed with new knowledge for those who are interested in these topics. *Green Stuff* is a useful aid for all ages curious of the subject matter or for those who have a school paper to write.

Illustrated by Jenny Jordahl.

Nominated for the 2018 Brage Prize

"Positive stories such as the ozone layer mending itself demonstrates that humans not only create climate crises, humans can also supply rescue operations. This book is just that: a rescue operation created by humans. (...) *Green stuff* is a book full of facts, a useful and useable book which is both inspirational and entertaining."
