The Storm - A Biography of Edvard Munch

Stormen - En biografi om Edvard Munch

Genre: Non-fiction
Category: Biography (Vol. I of II)
Publisher: Aschehoug
Year: 2023
Pages: 366
ISBN: 9788203363481
English sample translation available

Edvard Munch is not only celebrated as Norway's preeminent artist, but he also stands as a singular figure who has etched a permanent mark on global culture. *The Storm* chronicles the life of this prodigious artist who, after rattling Kristiania with his revolutionary artworks, made a dynamic entrance onto the European stage, emerging as a formidable force from the north. From the iconic 'The Scream' to captivating pieces like 'Madonna' and 'Vampire', Munch did more than merely depict scenes; he rendered raw emotions on canvas. His life and oeuvre navigated through an era marked by monumental shifts in both global events and the artistic domain. To understand Munch's journey is to journey through the tumultuous backdrop of his contemporary Europe.

'Ivo de Figueiredo's new Munch biography is an event (...). I only put the manuscript down when I had to. (...) With flow, pace, and a sense of anecdotes, the biographer follows the chronically restless, increasingly alcoholic artist from city to city, from environment to environment, from room to room, from painting to painting. (...) As soon as I finished 'The Storm' I started looking forward to the next volume.'

Klassekampen

'Outstanding about Munch! *The Storm* is the first volume in what will almost certainly become the definitive work on Edvard Munch for a long time to come.'

VG

'Grand Munch Biography. Every generation needs its Munch biography. This one will endure far into the next generation.'

Adresseavisen

In 2006/2007 he published a biography *Henrik Ibsen. The Man and the Mask*. This biography is today considered the most complete, well written and well researched biography on Ibsen.

Later came non-fiction titles for YA readers, the true crime title *The Mystery of Ingeborg Køber*, and the story of his own family *A Stranger at My Table*, of which one critic wrote: '*With A Stranger at My Table* Ivo de Figueiredo expands the understanding of what non-fiction can be [...]. One of the most significant Norwegian author of our time.'

In the fall of 2023, Ivo de Figueiredo released the first volume of his new biography *The Storm: A Biography of Edvard Munch* to rave reviews. The second volume will be published in the fall of 2024.

Unruly Women - Philosophers, Romantics, Revolutionaries

Opprørerne. Kvinner som endret filosofien

Genre: Non-fiction
Category: Philosophy
Publisher: Cappelen Damm
Year: 2024
Pages: 200
ISBN: 9788202824808
English sample translation available

The women in modern philosophy were as brave as they were prolific. The questions they asked were challenging, and the answers they offered were bold and unconventional. The women in modern philosophy delivered uncompromising analyses of truth, knowledge, ethics, social justice, gender, racism, and the relationship between human being and nature. Yet these women have been written out of the history of philosophy – and this to the extent that today we hardly know that they were there.

In Unruly Women: Philosophers, Romantics, Revolutionaries, Kristin Gjesdal brings the reader along to a philosophy class at Temple University in Philadelphia. With a group of students, she explores key ideas and concepts from eleven women who were left out when the history of modern philosophy was written. In a lively and accessible prose, she revisits the life and thoughts of these exceptional women. We encounter Germaine de Staël as she navigates the aftermath of the French revolution, Rosa Luxemburg as she fights for social justice in late nineteenth-century Berlin, and Angela Davis as she confronts American racism in California in the 1970s and beyond.

As activists and as philosophers, these women were rebels in their own time. Their thinking is no less unruly – or relevant – today.

Kristin Gjesdal is Professor of Philosophy at Temple University, Philadelphia. She has published a number of monographs and research articles on modern European philosophy and been invited to present her scholarship at top-tier universities in Europe, the US, Asia, the Middle East, Australia, and beyond. 'When I first heard Kristin Gjesdal's lecture on women in philosophy, it was almost a revelation (...) Here is a philosopher suggesting that women's presence in philosophy is not a new phenomenon. Women have been contributing to philosophy since the very beginning of the discipline. Kristin Gjesdal helps us to find the women in modern philosophy, see them, and understand their works. As philosophy. It is a great achievement.'

Echo. An essay on algorithms and desire

Ekko. Et essay om algoritmer og begjær

Genre: Non-fiction
Category: Essay
Publisher: Gyldendal Norsk Forlag
Year: 2021
Pages: 208
ISBN: 9788205536753

An investigative essay into some of the greatest challenges of our time:

Echo was the nymph who talked too much. For this, she was sentenced to a fate in which she could only repeat what others said.

In the 2000s, we meet Echo in the principles of media technology: in viral memes, social-media shitstorms and echo chambers. Whoever has the algorithms on their side wins the attention economy's highest prize: being visible. And Echo's great love was Narcissus, he who drowned in his own reflection.

In this essay, Lena Lindgren combines economics, mythology, psychology and science with scenes from Silicon Valley. It is a judgement of our age, a stream of consciousness, and an attempt to portray humanity's blind date with artificial intelligence.

More people are developing dementia or are at risk of developing it. The good news is that dementia diseases can be prevented, inhibited, and slowed down.

In the book *Dementia*, Norway's foremost dementia researcher, Professor Geir Selbæk, introduces completely new and previously unknown risk factors for developing dementia.

Knowledge about the connection between the individual lifestyle factors and dementia risk, why there is a connection, and how you yourself can influence the risk.

He demonstrates how each and every one can reduce these risk factors, thus lowering the chances of developing cognitive impairment. There is a lot that we can do ourselves to prevent dementia, and the author particularly focuses on eight crucial factors that we can address.

Dementia is one of our era's most significant public health challenges and prevention of dementia is a positive message, but it also involves difficult ethical questions. The road from scientific results to the real world and new treatment is often long.

Forests. On trees, people and thousands of other phenomenal species

Skogen

Genre: Non-Fiction
Category: Popular Science
Publisher: Kagge
Year: 2023
Pages: 279
ISBN: 9788248933069
English sample translation available

For a tree, life after death isn't just a hope but a reality. This is a book about forests; forest nature, species diversity and people; about the span from the millimetric perspective of an insect's short life – lived in its entirety beneath a scrap of bark – to the miles-wide expanses of sylvan landscapes where our exploitation of forests has shaped cultures and societies over hundreds of years. By weaving together ecology, history, politics and culture into an overarching narrative, the book offers readers an insight into a profoundly fascinating ecosystem, and give them a basis for understanding the role forests play in today's nature and climate crisis.

The first chapter describes the characteristics of a forest. The next deals with forest fires and storms. A third chapter looks at one of the most living things in the forest: dead trees. In the fourth you'll find examples of strange and surprising interactions between dead trees and other species. The fifth chapter is about how it isn't always easy to be a rare species in the forest, while chapter six hops like a hare through history, showing how timber has been used over the centuries. The seventh chapter covers ecosystem services other than timber. In chapter eight, we roam through the cultural undergrowth, defined as all the aspects of forests that rouse emotions and inspire expansive thoughts – be they myths, beliefs, pictures, books or just forests themselves. Or their absence. The ninth chapter is devoted to the ongoing debate about forests, before we round off with the tenth chapter, which is all about time, perspective and the shifting baselines in the forest.

In 2013, Jon Fosse converted to Catholicism. Fosse had resigned from the Church of Norway in protest at sixteen, but later found his way back to a religious worldview through his writing. He has been fascinated by Gnosticism and Christian mysticism and been drawn to the Quaker movement – but is now a Catholic. What happened?

In *Mystery of Faith*, theologian and Catholic Eskil Skjeldal, Ph.D. and Fosse discuss the path towards this conversion. They converse about faith and God, spiritual and mystical experiences, writing, alcoholism and illness, everyday life as a Catholic, and what Fosse thinks about the positions of the Catholic Church. In this book, you'll get close to both Fosse and faith.
