When the Barents Sea freezes in November, no planes, no ships and no supplies will arrive in Longyearbyen before the ice melts in May. Thus, there is no way to return to the mainland during the long winter.

Eivor arrives from Oslo with her husband Finn and their two small children. He will serve as one of the two doctors in town. Finn works long hours and Eivor feels as if the walls of the way too hot apartment are closing in on her. All alone, always armed with a rifle in case a polar bear should come too close, she skis further and further from the town, up the snowclad mountains to where she might see some daylight and find some solace.

Set in the late 1950s in Longyearbyen, the mining town on the Svalbard Archipelago, Heidi Sævareid's highly anticipated first novel for adults is a dense and brilliant story of a troubled marriage. It is also the story of a completely isolated, small community under constant threat by the forces of nature and gradually also by one of its inhabitants' mental illness.

We can't put it off any longer, I tell Nina. What can't we put off? Nina says. We have to get down to making babies, I say. Soon I'll be old: soon I'll be too tangled up with varicose veins to be able to make a baby with this body of mine. I'm getting older, I say. Nina looks at me. My eyes are wet with tears, because my heart.

Nina and Kitty are married and live an active life in Oslo, with careers and good friends. If they want to have a child, the time to start is now. It'll take more to make it happen than a romantic evening or two. They have to make a choice themselves if anything is going to happen. And life is so good just the way it is. They start to click around on a donor website, just to take a look.

What does trying to have a child entail? Will it corrode their relationship? Is Kitty's body even capable of bearing a child? And why does the thought of new life make Kitty think of death?

The Body Is a Murderer is a complex love story about Nina and Kitty; an urgent and intimate examination of the life we have and the life we make.

Insightful and poignant about ageing and the longing for intimacy.

Sex is adulthood's wild, existential game and its promise of intimate companionship. It is attachment, risk and transgression. It is a vague and, at the same time, overexposed promise of reward and satisfaction.

What does this look like to a woman beyond life's halfway point, in a long-standing marriage, one in which he has felt restrained while she has felt rejected? She cheated on him once twenty years ago; he confesses to her that he lives a double life with a younger mistress and would very much like it to carry on that way.

What happens to those we cheat on, to those we abandon? What happens to us when we fall apart and reinvent ourselves? Do we remain intact? Or are we, despite our most sincere efforts, shattered and sometimes laid low by encounters with the face of the person we once loved, their touch, their smell, their feeling, the memory of that feeling?

Wencke Mühleisen (b. 1953) is a researcher in gender and media at the University of Stavanger. As a performance artist, writer and researcher she has worked with our cultural and media-formed understanding of sex and sexuality.

A writer has withdrawn to her study at Yew Tree Cottage, in a tiny English village. A young boy comes to build an aviary – a large outdoor birdcage. In the evening she drives him to a field where he claims to live, although there is no house there. While the boy is putting up the aviary, she creates a connection through the text she is writing, drawing a line that resembles the roads through the English landscape, creating a junction between the past and the present. When she looks in the mirror, she often sees her mother, and sometimes her daughters. An incident in her own childhood in Norway in the 1960s becomes a point of departure for understanding.

The Anatomy of Birds is written in lucid, vibrant prose, which hovers above a dark green landscape.

Nominated for the 2019 P2 Listeners' Novel Prize

Dear Death

Til døds

Genre: Fiction
Category: Novel
Publisher: Aschehoug Forlag
Year: 2020
Pages: 212
ISBN: 9788203266461

Yvonne hasn't been in touch with her father since her teens. When he shows up out of the blue, it is primarily because he is in need of a place to die. He moves into her one-bedroom student flat and soon her entire life evolves around facilitating his final days.

Dear Death is the story of the protagonist's search for a language that can make the bottomless tragedy bearable and also help mend the strained relationship between father and daughter. In this brave and personal novel, Holck suggests that some solace may perhaps be found in the two's shared sense of very dark, sometimes obscene humor and their stubborn insistence on finding new approaches to living, and dying.

Cesilie Holck (b. 1979) lives in Bergen. She made her literary debut in 2009 with the short prose collection *Norg.* *Dear Death* is her second novel.

The Beast – partly Mary Shelley, partly Wes Craven, partly Samuel Beckett, but completely Per Schreiner.

On a jog through the woods one quiet spring day, Knut gets bitten by an animal. A day later, his body begins to change. Small growths appear around his throat. His sense of smell grows stronger, and he is struck by an inexplicable hunger. In any case, nobody reacts to the changes he is going through – neither his wife, his daughter, nor the neighbours in his pretty suburbia. Even Knut himself doesn't know what to believe. Perhaps it's not so bad after all; life goes on. A beast still has to do the laundry. A beast still has to make the dinner.

King Lear meets *Pulp Fiction*: A love story set in a coastal landscape featuring windmills, racism, dark secrets and Rolling Stones. A family drama from a windswept corner of Stadlandet, a peninsula in western Norway – Lars Lenth is back with an engaging and ever surprising fairy tale of what modern Norway is really like.

Lawyer Leo Vangen is in love. Anita Fostervold from Stad seems to be everything he has ever dreamed of until he meets her mother, 84-year-old Agnes Fostervold – former academic, avid racist and Mick Jagger-fan. She runs a wind farm in the Hoddevik Mountains and a refugee centre in the old family hotel in Selje. Now the refugee centre stands empty. The authorities have cut off the supply. The matriarch wants to sell both hotel and wind farm. Her three damaged children – Anita, Bill and Charlie – jostle for position. But first Agnes must get rid of the Afghan family hiding in the basement and the uncooperative, bare-chested tenant residing in the stone cottage on the neighbouring lot. *Gimme Shelter* drills deep into Western Norway's nature, but even deeper into human nature.

Photo: Agnetha Brun

Lars Lenth (b. 1966) is Norway's undisputed number one when it comes to fly fishing for trout. His literary debut came with the novel *The same river* in 2007, a fly fishing novel following a young man's experiences through a season of fishing. *The Norwegian patient* introduced the lawyer Leonard Vangen and the criminal Rino Guliksen, two characters whom readers have grown fond of. Leo and Rino reappear in Lenth's next novels, *The Vega Brothers*, *Men who hate wolves* and now in *Gimme Shelter*. In all four novels there's a deep felt tension between man and nature. Lenth names Elmore Leonard, James Lee Burke, Carl Hiassen, Nick Hornby, Knut Hamsun and the Coen brothers as his main influences.

Ole Vik is back.

So is his haunted past.

A truck is being hijacked on a road near Fjellberghavn, and the driver is murdered. At the same time a desperate father turns to the police to get help with his drug addicted daughter.

The murder investigation reveals that the hijacked is connected to drug dealing, and that several deaths by overdose in Fjellberghavn in fact have been deliberate killings. At the same time Police Chief Cecilie Hopen suspects information is being leaked from the investigation. Is there a Judas within their own ranks?

Jittering excitement, personal warmth and human relationships are Jørgen Jæger's trademarks.

'Since his debut in 2003, Jørgen Jæger has established Cecilie Hopen and sheriff Ole Vik as some of the country's most popular crime heroes.'

Jørgen Jæger consolidates his position at the top of the Norwegian Crime arena. Last year he sold one book every fourth minute, making him Norway's third most sold crime author. Set in the picturesque remote town of Fjellberghavn, the highly respected police chief Ole Vik and his adept detective Cecilie Hopen are constantly dragged into investigations riddled with social dilemmas, which Jørgen Jæger eloquently incorporates. Through his addictive prose he makes you want to know everything about Fjellberghavn and its inhabitants – resulting in approximately 130 000 books sold every year.

Critically acclaimed Jæger is highly renowned among booksellers, and has been nominated to the prestigious Norwegian bookseller award four times.

A group inspired by Norse mythology is hunting down and executing part of the financial and political elite, claiming the judicial system has failed. The murders trigger fear within the establishment and applause in social media. When one of Norway's richest men is found executed in a closed down nursing home, Milo Cavalli joins the team of investigators. However, the origin of his family fortune in Italy also makes him a target for the group of Norse revengers. He must find them before they find him.

The main character in Asle Skredderberget's crime novels is Milo Cavalli. Half Norwegian and half Italian he is not your typical Nordic noir investigator. In fact, he's quite the opposite. Milo is successful, attractive, wealthy and also a catholic who regularly goes to confession. He taps into his family fortune whenever he needs to, in order to crack the case he's working on.

Creativity : Why Daydreaming Will Save the World

Kreativiteten. Hjernevitskapen bak ideene og hvorfor dagdrømmerne skal redde verden

Genre: Non-fiction
Category: Popular Science
Publisher: Cappelen Damm
Year: 2020
Pages: 304
ISBN: 9788202635510

What is creativity, really? What drives creativity, and how can we all learn how to be more creative?

The Key to Creativity is a book that combines brand new brain research on creativity, the cultural history of creativity and an analysis on society, as well as the experience of a number of creative people. It is a narrative exploration of creativity, as well as a criticism of society. It is a counterpart to a society that wants to measure everything, where everyone feels the pressure to perform and become a celebrity.

With this book the author tries to make messing about, boredom and trying and failure the new gold standard: Because when AI and the climate crisis arrives, we will have to be very creative! And creativity lives in a very strange place, what the researchers call DMN, also known as daydreaming.

Through the six chapters the author explores where ideas come from and how they feel, what a good idea really is and if you can die from them? For one chapter she battles her inner critic through meditation, impro theatre, electricity through the brain as well as very tight deadlines as she tries to find out what it takes to finish a creative project through talking to some of the very best and most creative people.

There are more than enough books that would like to give you the instructions on how to be creative. This is not that type of book.

The World at the Tipping Point. How bad can it get?

Verden på vippepunktet. Hvor ille kan det bli?

Genre: Non-fiction
Category: Nature and popular science

70 000 years ago, there existed a species, comprised of scattered populations of a few hundred individuals each, who generally lived peaceful lives in a corner of Africa. Today, that species consists of 9 billion individuals, and it has begun to fundamentally alter the planet. The species in question is us.

What we are doing to the earth, can be registered on a geological timeline showing hundreds of thousands of years. So extensive are the emissions of climate gases and the reduction in biodiversity that we caused, during only a brief moment in the long history of the earth.

Dag O. Hessen, professor of biology at the University of Oslo, is not one for mincing his words. science, not fearmongering, he explains the contemporary state of nature and climate – and how badly things may turn out. The great risk factor is the different feedback loop mechanisms that will intensify the changes.

Simultaneously, human culture is constantly changing. Perhaps are we, too, standing at the tipping point? Will we be able to turn this development in time, to avert the worst possible scenarios? This book is a powerful appeal for the need to do more – and to do it quicker.

Who were the people who built this glamorous, dirty, infinite metropolis, and what is it about their descendants that makes London such an exhilarating experience today? The author goes on a quest in London to meet the people who have shaped the most cosmopolitan city in the world – but also to understand more about her own identity.

With Britain being more divided than it has been in a generation, and with many calling for an end to 'the experiment of immigration', London has held firm.

No other book has ever captured the diversity of London in such a rich and remarkable manner. Where would London be without the hard work of the Irish, the sweetness of the Italians, the music of the Caribbean, the Indian food or the wealth of the Russians – to mention some of the communities that feature in this book.

It offers both a historical backdrop and insight about the British Empire and the immigration that has created London's unique fabric. There is no doubt: every impression you have had about this city will change as you read this book.

'Nazneen Khan-Østrem has written the ultimate book about Great Britain's capital.'

We humans have always used our hands to create the world around us. Until now. Today we have gone from being practitioners to theorists, from being producers to consumers. What happens to us when we no longer use our hands? What happens to society? This is the story of building a small, but absolutely necessary house on your own and feeling an intense joy of doing it by yourself.

Siri Helle inherited a cabin of 25 square meters, without electricity and without inlet water, and without an outhouse. She decided to build the outhouse herself, a bit like a protest, but mostly to find out if she was able to do it.

The outhouse is being built with material found at sight, different from any other outhouse since it is built by an amateur, and Siri learns a lot. She manages to make the planks from the large threes, she builds the turf, she braids walls of juniper twigs, uses her knife to make shavings – and her sense of achievement grows. A feeling stronger and warmer than many other in this world.

And together with these feelings she feels a growing connection to her own roots. She never met the grandfather who built the cabin. But the feeling of belonging, and the feeling of contributing to his work with her bare hands is strong. To create, to build something with your own hands, create something useful – is something everyone should try, she thinks. Not at least, those who think they can't.

She has so far outlasted 14 prime ministers – from Winston Churchill to Boris Johnson. She is the world's longest-reigning monarch. She is so famous that you would probably recognize her face faster than that of a close friend. She fascinates us and yet she remains a mystery.

The Years with Elizabeth takes you deep into the royal chambers. It shares tales from the Queen's life and the many dramas of the royal family – the loves, the feuds and the divorces – and casts an enquiring gaze over what is really going on when millions of people weep over a dead princess or rejoice at a royal wedding.

Deftly, with a feel for both intriguing details and the longer, historical perspective, Inger Merete Hobbelstad writes with charm and sensitivity about the British royal family, about each of its key members and about British history. The story of the House of Windsor is also the story of the United Kingdom's road from the Empire to Brexit. The book abounds in funny, tragic, unheard and unforgettable tales, displaying a wealth of knowledge and interpretations. At the very centre of the story stands Elizabeth: daughter, sister, mother, wife – and Queen.

Inger Merete Hobbelstad is a journalist. She works as a commentator and critic in *Dagbladet*. In 2016 she wrote *Living with Shakespeare* (Tiden Forlag).

In the Combat Zone of Finance

På finanskrisens slagmark

Genre: Non-fiction
Category: Current Affairs / Finance
Publisher: Hegnar Media

Pages: 425
ISBN: 9788271463656

Financial crisis hits regularly in our world of debt. The crisis in 2008 was among the worst and can teach us the most. Iceland had risen the most pre-crisis, and fell the furthest. The third largest bankruptcy in economic history hit the country in the course of one week. What's more, Iceland defied the perceived rules of finance and became the only country where all systemic banks collapsed, and no bailout was even attempted, where the currency adjusted freely, financial currency exchange forbidden and the creditors were fought. It became the world's only test bed of the opposite cure. Amazingly Iceland, hit hardest, rose fastest.

This is an insider's account told through anecdotes, dialogues and personal stories. It covers the 2008 financial crisis, its aftermath and the lessons, as the worldwide forces of finance and politics converged in Iceland. Here all was revealed, bankers jailed, and the true behaviour inside the glossy facades could be seen. The UK placed Iceland on its list of terror organizations, Iceland was taken to court and the EU, the US, Russia and China all joined in, some as opponents, some as supporters. Perceived geniuses turned out to have been indebted gamblers. Twenty of the 50 largest US hedge funds battled in search of profit. Some made billions. Others got burned. Their behaviour, strengths and weaknesses were revealed, as in no other country. The events and learnings are placed in context of the financial risks facing the world in 2020, all knowledge that unfortunately one day could become immensely relevant.

Photo: Private

Svein Harald Øygard was interim Central Bank Governor of Iceland in 2009, after the crash. He was Deputy Minister of Finance of Norway from 1990 to 1994, being part of the team addressing the Norwegian banking-, macro and currency crisis. He worked as an international corporate strategist at McKinsey and Company from 1995 to 2016, with a break to become Governor. Øygard was parachuted into a crisis-ridden country, becoming one of a handful of non-citizens ever to head a Central Bank. Øygard's role gave him a unique vantage point from which to observe Iceland, its people and its institutions, as well as the forces of global banking, finance and economics. He saw how institutions and leaders behaved, from inside the system, during one of the world's worst crises.

No continent has been populated by humans as long as Africa has, and in this book we are taken on an exciting journey, stretching from the first hunter-gatherers to the present day. The author presents up-to-date knowledge and new perspectives, highlighting Africa's contribution to our shared global history. The book is richly complemented with pictures and maps, and is aimed at both students and wider audiences.

'(...) brilliant, broad-scoped volume written for a commonly curious reader.'

Klassekampen

"... a triumph of a book (...) deserves to remain a standard work of reference for many years to come.'

Morgenbladet

'(...) a relaxed and unpolemic case for the lack of reasons to cling to Eurocentrism. We all come from Africa, anyways.'

What are Conspiracy Theories? Hva er konspirasjonsteorier

Genre: Non-fiction
Category: Current Affairs
Publisher: Universitetsforlaget
Year: 2019
Pages: 156
ISBN: 9788215029931

To be able to understand many of the darkest chapters in our history, as well as understanding our own time, it is necessary to know the mechanisms of conspiracy thinking. One worldview filled with conspiracy theories was the one of the Norwegian mass murderer from July 22nd 2011.

Conspiratorial constructions of an enemy have been used as a mobilizing force in Putin's Russia, in Erdogan's Turkey and most recently in the US election campaign. We find conspiracy theories in everyday life, in the dissemination of fake news and rumors, they appear incessantly in popular culture, and they are encountered across the political spectrum. Conspiracy theories are used by people of all income groups and all levels of education. However, some believe in them more often and more strongly than others. Why is it so? The prevalence of conspiracy theories in society also varies over time. What makes them increase? These are among the questions that are addressed in this book, and to answer them the authors use knowledge from different disciplines such as psychology, history, religious studies, literary theory and sociology.

Asbjørn Dyrendal is Professor at the Department of Philosophy and Religious Studies at the Norwegian University of Science and Technology in Trondheim. His research and publications have focused on the different expressions and conditions of contemporary religion, political science and conspiracy culture.

Terje Emberland is an author and Senior Researcher at The Norwegian Center for Holocaust and Minority Studies in Oslo, with a long list of publications on fascism and conspiracy theories.

Harmful Help: The possible negative effects of psychotherapy

Skadelige samtaler. Myten om bivirkningsfri terapi

Genre: Non-fiction
Category: Psychology
Publisher: Tiden Norsk Forlag
Year: 2019
Pages: 250
ISBN: 9788210057182

Psychological treatment and psychotherapy are intended to reduce human suffering. When someone seeks help, the professional therapist shall listen to what is being told, contain it, and provide advice or interventions in order to help patients be able to develop new and more adaptive behavior, thought processes and emotional responses. It is therefore paradoxical that psychotherapy, provided with the best intentions, may have negative effects. How is it possible that such interventions aimed at curing mental disorder increase symptoms or suffering? How may something that is designed to help end up being harmful?

This book investigates contexts, areas, therapists and instances where psychological treatment is counterproductive; when doing nothing actually would have been more helpful. The authors also suggest possible steps toward a culture of greater openness and a safer mental health care system.

Genre: Non-fiction
Category: Handbook
Publisher: Gyldendal Norsk Forlag
Year: 2020 - Due Medio March
Pages: Approx. 200
ISBN: 9788205529816

Never before have so many people been drawn out into nature. This book answers the question that many have been wondering about: Why and how should I sleep outside?

Sleeping Outside is a "survival guide" for nights in nature. It is easy to read and detailed, yet varied and packed with information. Here you will find everything you need to know about common issues when it comes to sleeping outdoors – everything about the weather, the seasons, regulations, campsites and landscapes, combined with information about modern equipment: clothing, sleeping bags, tents, hammocks, lean-tos, other methods of accommodation, cooking equipment, and so on.

Included in the book are vivid descriptions of what happens around us in nature at night, about the night sky and how to study it, about the northern lights, stormy weather and other phenomena that at times make this more or less worth doing. All of this laid out in detail and with a focus on sleeping outside.

In *The Planet Rescue Club* is an ambitious suspense series about the environment and climate change for children (6–9 years). Here we meet Vanja, Sivert and Mo, who live in a small village in Western Norway. But mysterious things can happen even in a small place.

In the first book, *The Black Swans*, a boat crashes into the quay outside the factory. Vanja, Sivert and Mo discover an oil spill in the fjord and the white swans are now covered with oil. Does the oil come from the boat or is somebody intentionally polluting the fjord? Can it be the wealthy factory owner who is dumping the oil? Or is his mysterious assistant Luke responsible? When the adults don't believe what the children tell them, «The Planet Rescue Club» must take matters into their own hands.

Winner of the 2020 Ministry of Culture's Prize for best illustrated children's book

In the second book, *The Cottage that Disappeared* we are on the farm where Vanja lives and the animals have just been let out to graze. But then many of them get sick. At the same time, something is going on at the empty cabin in the forest, where Vanja and Sivert have always played. One day it is torn down and the refuse is littered throughout the countryside. Who is tearing down old cabins and building new? And who is dumping the waste that is hurting the animals?

Illustrated by Jens Kristensen.

If you are new in class, you'll be shy for at least a week. Everyone knows that – except Tjodleik.

Tjodleik thinks he can be friends with everyone, not least Rose and Sina, who are Team Rosin, the school's very own dream team. When all the mobile phones in the school are stolen during a fire drill, Tjodleik wants to bring in the two girls to solve the theft. But guys like Tjodleik, who lives in a greenhouse and thinks it's perfectly alright for people to walk around without any clothes on, don't have much of a clue about anything, even though some of his hobbies turn out to be useful.

* *The Nudists* is a fun crime light novel for avid young readers.

* A new book by Bjørn Ingvaldsen that splices things up with its distinctively humorous style, and assembles an apparent chaos with warmth and a sting in its tail.

* With 50 books published, this is an author who has proven that he has mastered the great breadth of children's literature – everything from dark and disturbing tales to genuinely funny and humorous stories.

"It's easy for girls. They can say whatever they want. They can talk about things that never really happened."

When school starts again after the summer, something has changed. Suddenly the most popular girls in the class want to hang out with Samuel and Jonas, but Samuel can only think of the mysterious girl he met at the building site. Who is she? And how can he get hold of her?

At the same time, their newfound popularity puts the friendship between Jonas and Samuel to the test. What actually happened at the party, the one that Samuel left early? That party that Jonas stayed on at?

A story about practising until it sticks, about mysterious girls, and about who is really telling the truth.

It's Christmas Eve in the forest. A hare is trying to escape from the hungry fox. When hiding in the deep snow, he stumbles upon a hare girl. He thinks that she has the most beautiful long ears he has ever seen. She tells him about Christmas and that soon there will be peace on earth for everybody. Soon they will be safe. Together they are daydreaming and waiting for it to happen. But they don't notice the fox sneaking up on them. He attacks, they run in different directions and get separated. The hare is devastated because he is sure that she was eaten by the fox.

Lemmings – a heartbeat in the mountains

Lemen – fjellets hjerte

Genre: Children and Young Adults
Category: Nature
Publisher: Mangschou Forlag
Year: 2020
Pages: 52
ISBN: 9788282382038
English, German and Swedish edition available

The lemming is a small hamster, with a thick sausage like body, with short legs, and tiny ears. It is easy to recognize as they have a very characteristic appearance, with yellowy-orange fur speckled with black spots on their heads and along their backs. During the "lemming years" the furious lemmings are everywhere in the mountains. There are millions. But suddenly they are all gone, and many years can pass before you see a lemming again. Why?

In this book, you can follow the Scandinavian lemmings through the different seasons of the Nordic mountains, and through peak years and low years. You can read about the lemming and how it manages to survive the hard winter. The lemmings live under the snow and eat the moss no other animal likes to eat!

The fact that the number of lemmings differs from almost none in a "low year" to millions in a "lemming year", makes a big difference for both plants and other animals in the mountain eco system. One can in fact observe from satellites that a "lemming year" has occurred; the enormous eating of the small, but numerous amounts of lemmings are visible from space! The arctic fox, snow owl, long tailed skuas and the least weasel can only breed when the number of lemmings are on top. In other words the lemmings are so important that they are called "a heartbeat in the mountains".

Come along into the sea!

Did you know that the blue whale is the largest animal that has ever existed? That it is even bigger than the biggest dinosaurs? And that long ago, the whales had four legs and lived on land? In *The Blue Whale* Andreas Tjernshaugen takes you into the sea. You can read about the life of the blue whale – what it eats, where it swims and how it breathes through a nose that is at the top of its head. You also get to know how the blue whales have become so big and how we humans almost (but fortunately only almost) exterminated all the blue whales in the world.

A fantastic book for anyone curious about life in the sea.

Illustrations by Line Renslebråten.
